One of the exciting new additions to the VIVA! line at Home Depot this spring is Calypso calla lilies. Calypso is designed to add a tropical flair to the garden with its wide range of festive colors, including a deep purple, mauve pink, bright yellow, tangerine, lilac and others.

“Many garden center customers already know the traditional calla lily,” says Ray French, product manager for Florigem. “With all the vibrant colors available in the Calypso line, they will fall in love with this easy-to-grow plant all over again.”

While some Calypso varieties have been popular here in the United States for a few years, the Calypso callas represent the first time these hybrids have been pulled into a complete line with upscale packaging.

Calypso calla will be found nationwide at Home Depot stores this spring. For more information on the VIVA! line, visit [www.vivagarden.com](http://www.vivagarden.com) or [www.homedepot.com](http://www.homedepot.com).
