## Ball's Coleus 'Henna' Now In VIVA! Line

April 7, 2009

[Send](#) [Share](#) [Print](#) Text Size: [A](#) [A](#) [A](#)

Coleus 'Henna' is available nationally this spring in the VIVA! collection at The Home Depot.

'Henna' has beautiful and different foliage that is chartreuse with copper patterning on top of the leaves and a dark burgundy underside. It will get about 18 to 24 inches tall in the garden with a spread of about 16 inches. 'Henna' is a Ball FloraPlant product.

"The last few years, there have been quite a few new coleus that have come to market," says Ray French, product manager of the VIVA! line for Florigem. "In design, we look for bronze- and copper-toned contrasts, and the fact that 'Henna' will do well in shade or in sun will allow widespread use of this great new plant."

For more information on 'Henna,' visit [www.vivagarden.com](http://www.vivagarden.com).
